ACTIVIDAD 03

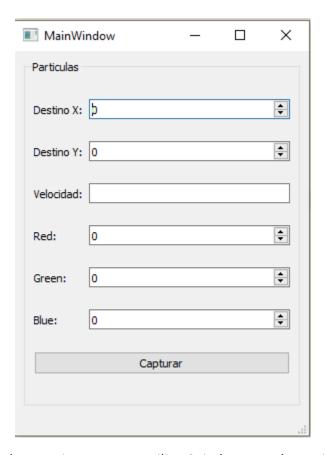

UI: User Interface

Gomez Casillas Hector Samuel

SEMINARIO DE SOLUCION DE PROBLEMAS DE ALGORITMIA

LINEAMIENTOS DE EVALUACION:

- El reporte está en formato Google Docs o PDF.
- El reporte sigue las pautas del Formato de Actividades.
- El reporte tiene desarrollada todas las pautas del Formato de Actividades.
- Se muestra la captura de pantalla de la interfaz de usuario corriendo desde Python con los widgets para representar la información de una particula (como se definio en el punto 1 de las instrucciones).

Esta seria la interfaz de usuario que cree, utilice Spin box para los atributos que necesitan estar en rango de 0-500 y 0-255, y solo un Line Text para capturar la Velocidad.

CONCLUSIONES

Yo ya había trabajado con interfaces graficas en proyectos pasados, asi que estaba familiarizado con los conceptos para poder crear una, solo fue cuestión de ver el tutorial para saber como hacerlo en Python con Visual Code.
